

STATEMENT OF CONSIDERATIONS

REQUEST BY THE CARGILL DOW LLC FOR AN ADVANCE WAIVER OF DOMESTIC AND FOREIGN PATENT RIGHTS UNDER DOE COOPERATIVE AGREEMENT NO. 04-03-CA-70372; W(A)-03-029; CH-1154

The Petitioner, Cargill Dow LLC, has requested a waiver of domestic and foreign patent rights for all subject inventions arising under the above referenced cooperative agreement and subcontracts entered thereunder. The cooperative agreement is entitled "Making Industrial Biorefining Happen."

The objective of the cooperative agreement is to develop and validate process technologies which will cost effectively produce sugars and chemicals such as lactic acid and ethanol from lignocellulosic biomass

The total anticipated cost of the cooperative agreement is \$52 million, with the Petitioner providing about fifty percent (50%) cost sharing. This waiver is contingent upon the Petitioner maintaining, in aggregate, the above cost sharing percentage over the course of the agreement.

As noted in its waiver petition, Petitioner has constructed a \$300 million facility to convert biomass in the form of corn starch to polylactide polymers and lactide. Petitioner holds over 110 U.S. patents covering various aspects of this process and the resulting products. In addition, Petitioner operates a 140,000 metric ton/year polylactide polymer plant in Blair, Nebraska. The facility, when fully constructed will be the largest lactic acid production facility in the world. Petitioner states that it continues to invest approximately \$15 million/year to improve this technology and lower production costs. Considering Petitioner's technical expertise, established market position, and significant investment in this technology including sizable cost sharing in this cooperative agreement, it is reasonable to conclude that Petitioner will continue to develop and ultimately commercialize the technology and products which may arise from this cooperative agreement.

As set out in the attached waiver petition, Petitioner has also requested a waiver of patent rights in the subject inventions of its lower tier subcontractors, provided that they agree to the same terms and conditions by which Petitioner will be granted the advance waiver. It is believed that this approach will facilitate timely commercialization of the technology by furthering the establishment of business and technical relationships between the parties and providing a mechanism for obtaining meaningful cost sharing between the parties. This waiver contemplates that the parties will allocate title or other rights to inventions among themselves as they deem appropriate during the course of their association consistent with the terms of this waiver. Accordingly, title will be waived directly to a subcontractor upon mutual agreement of the Petitioner and the subcontractor. However, this waiver will only apply to such subcontractor(s) who provide a letter to DOE acknowledging their right to ask for a waiver and agreeing to the terms of this waiver. This waiver shall not impact the rights of those parties subject to Public Law 96-517, as amended, nor shall it grant any rights in inventions made by employees of the National Laboratories.

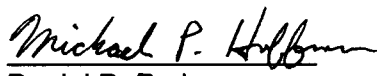

Thus far, logen, Inc., a subcontractor under this cooperative agreement has requested and agreed to the same terms and condition of this waiver. logen owns and operates the

world's largest integrated biomass conversion pilot plant and runs a successful enzyme manufacturing business. logen is a Canadian company.

Petitioner has agreed that this waiver shall be subject to the march-in and preference for U.S. industry provisions, as well as the U.S. Government license, comparable to those set out in 35 U.S.C. 202-204. Further, Petitioner has agreed to the U.S. competitiveness provisions as attached to this Statement. In brief, Petitioner has agreed that products embodying intellectual property developed under this agreement shall be substantially manufactured in the United States, and that Petitioner will not license, assign or otherwise transfer any waived invention to any entity unless that entity agrees to these same requirements. Additionally, Petitioner has agreed to contractor data licensing provisions as attached herein. Furthermore, this cooperative agreement is awarded under the Energy Policy Act, PL 102-486, and subject to protected data provisions which allows for data produced under the agreement to be protected for 5 years, and is also attached hereto.

Referring to item 10 of the waiver petition, granting this waiver is not anticipated to have any adverse impact on competition. The chemical products of interest in this agreement are commodity chemicals that are produced by other suppliers in the U.S. and the world. These can be produced using other fermentation processes and various methods including the use of petroleum stock. Accordingly, the success of this cooperative agreement can be expected to stimulate further investment and competition in this technology.

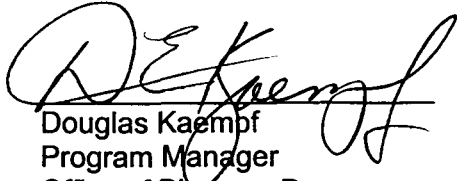

Considering the foregoing, it is believed that granting this waiver will provide Petitioner with the necessary incentive to invest its resources in the commercialization of the results of the cooperative agreement in a fashion which will make the above technology available to the public in the shortest practicable time. Therefore, upon evaluation of the waiver petition and in view of the objectives and considerations set forth in 10 CFR 784, all of which have been considered, it is recommended that the requested waiver be granted.

for Daniel D. Park
Assistant Chief Counsel
Intellectual Property Law Division

Date: 4/19/04

Based upon the foregoing Statement of Considerations and representations in the attached waiver petition, it is determined that the interests of the United States and the general public will best be served by a waiver of patent rights of the scope described above, and therefore the waiver is granted. This waiver shall not apply to any modification or extension of the cooperative agreement, where through such modification or extension, the purpose, scope or cost of the cooperative agreement has been substantially altered.
